a small family farm offering consumers an alternative to industrial & commercially raised food

## What is a Free Range Turkey?

### Free-range

"Free-range" means animals see the light of day and their feet actually come in contact with the earth and they spend as much time roaming around as they like. Our turkeys have plenty of access to grass, grubs and a ravine for shade. They can roam on 9 acres of pasture. Their shelter is a an open-sided greenhouse so that they are getting natural light even when they are under cover.

They have endless fresh air and sunlight and have more room to wander than they could possibly use.

THEY ARE HAPPY ANIMALS.

### Free-run

"Free-run" means animals can move around in open concept barns, but they DO NOT necessarily have access to the great outdoors, and overcrowding may still be an issue.

### Cage-free

"Cage-free" means animals are not confined to battery cages, but that's about it. They don't have access to the outdoors.

**All of our turkeys are FREE RANGE**

**HAPPY ANIMALS = HEALTHY ANIMALS**
